	MASSIVE SUPERLOADS ARE MAKING THEIR WAY THROUGH WESTERN PENNSYLVANIA THIS FALL, CARRYING HEAVY EQUIPMENT ALL THE WAY FROM SCHENLEY TO HOMER CITY. THE LOADS ARE ABOUT 200 FEET LONG, 17 FEET WIDE, AND WEIGH NEARLY 400 TONS. BECAUSE OF THEIR SIZE, PENNDOT HAS BEEN WORKING WITH PENNSYLVANIA STATE POLICE, UTILITY COMPANIES, AND TRANSPORTATION CREWS TO SAFELY MOVE THE LOADS ALONG THEIR ROUTE. ONE SUPERLOAD HAS ALREADY MADE ITS WAY TO HOMER CITY, BUT DOZENS MORE ARE EXPECTED. EDWARDS MOVING AND RIGGING SAYS ABOUT 53 ADDITIONAL SUPERLOADS ARE EXPECTED TO MAKE THE TRIP THROUGH JANUARY OF 2027. THESE LOADS WILL BE CARRYING EQUIPMENT TO BUILD THE NEW HOMER CITY ENERGY CAMPUS. THIS INCLUDES HEAT-RECOVERY STEAM GENERATORS AND OTHER MAJOR POWER-PLANT EQUIPMENT. THESE SYSTEMS WILL HELP THE NEW FACILITY PRODUCE ELECTRICITY MORE EFFICIENTLY. MORE SUPERLOADS ARE EXPECTED TO ARRIVE IN THE COMING MONTHS.
